

ADAPTIVE ALPINE LEVEL I & II PROFESSIONAL DEVELOPMENT LOG 3-TRACK, 4-TRACK & SLIDER

Name: _____

Revision: August 2018

This development log is a tool for you to expand your skiing, teaching and technical skills in preparation for your Adaptive 3-Track, 4-Track and Slider exam(s). As you are preparing for your exam(s), include comments and notes you find beneficial. You can either type your notes directly into this document or print the document and write in your notes. If you choose to type your notes, be sure to save the document and print it out.

You are required to scan or mail a copy of your completed Development Log to PSIA-NW a minimum of one week prior to your on-snow exam. Please see the final page of the Development Log for instructions. Your log will be sent to your examiner ahead of the exam for him/her to review. **The outcome of your Adaptive 3-Track, 4-Track and Slider Exam does not depend on how much you write on this log.**

Note: The Americans with Disabilities Act (ADA) requires that testing entities such as PSIA-NW-AASI make "reasonable accommodations" for qualified candidates with disabilities (whether physical or cognitive) and to the extent that they would not "fundamentally alter" the services being provided. Members with disabilities who are considering applying for an education course or certification exam must contact PSIA-NW-AASI at (206) 244-8541 at least four weeks in advance of a scheduled course or exam to provide notice of their requested reasonable accommodation and discuss their situations. This allows PSIA-NW-AASI to assess your request for a reasonable accommodation and to plan for reasonable accommodations, if necessary. Requests for accommodations will be considered on a case-by-case basis.

The essential eligibility requirements for each Adaptive Alpine Level I & II exam are presented in the PSIA-NW-AASI Adaptive Alpine Certification Guide. The standards are national in scope and their maintenance is necessary in the interests of public safety, effectiveness, value for the consumer, and guest/employer expectations.

The ADA does not require reasonable accommodations for a transitory or minor disability. A transitory disability is an impairment with a duration of six months or less, such as one caused by illness or injury. If this applies to you, you may contact the PSIA-NW-AASI office to receive or refund or to transfer to a future clinic or exam.

You may refer to the PSIA-NW-AASI Americans with Disabilities Act (ADA) Policy for further information.

The information in this document is provided only as a guideline. Although every effort has been made in preparing and assembling this guideline, with a goal of providing timely, complete, and accurate information, PSIA-NW-AASI makes no claims, promises, or guarantees about the timeliness, accuracy, completeness, or adequacy of the contents of this guideline, and PSIA-NW-AASI assumes no liability or responsibility and expressly disclaims liability for any errors and omissions in its contents

Local and program regulations and safety guidelines take precedence over this information. It is in your best interest to exercise due diligence in determining the appropriateness of the information for your particular circumstances. In addition, please take into account any and all factors that may affect your lesson. This includes but is not limited to: the health, well-being and fitness of the guest; weather conditions; terrain; other people on the slope; your own abilities, as well as those of your guest and anyone who may accompany you.

This guideline provides links to other resources as well as websites owned by or maintained on behalf of third parties. ✓	Adaptive Level I & II Technical Knowledge	Comments/Notes
<p><i>Your guests expect you to provide them with something they don't have: the technical knowledge needed to improve their skiing performance. Do you understand the technical aspects of skiing well enough to communicate this knowledge to your guests?</i></p>		
	<p>Understand the PSIA Skills Concept and Movement Pools. <i>How are they used in various skiing conditions? How are they used in the adaptive environment?</i></p>	
	<p>Understand and use Movement Analysis. <i>You can practice on your peers or by watching videos. (YouTube.com and vimeo.com have some adaptive skiing videos.)</i></p>	
	<p>Understand Cause and Effect relationships. <i>How is this used in movement analysis? Can you use this in your lessons?</i></p>	
	<p>Identify body-part specific Rotary Movements.</p>	
	<p>Identify body-part specific Pressure Control Movements.</p>	
	<p>Identify body-part specific Edging Movements.</p>	
	<p>Understand how skills are blended. <i>How are the skills blended differently for various snow and terrain conditions?</i></p>	
	<p>Read the <i>Alpine Technical Manual</i>. <i>What new ideas can you incorporate in your lessons?</i></p>	
	<p>Read the <i>Adaptive Alpine Technical Manual</i>. <i>What new ideas can you incorporate in your lessons?</i></p>	

✓	Adaptive Level I & II Teaching Knowledge	Comments/Notes
<p><i>Your teaching knowledge allows you to effectively translate your technical knowledge to your guests. Are you offering your guests the most positive and safe skiing experience?</i></p>		
	<p>Learn to recite “Your Responsibility Code.” <i>How can you effectively incorporate this into your lessons?</i></p>	
	<p>Learn to recite the Smart Style Points. <i>When do you use this? How can you get your guests to understand these points?</i> http://www.nsaa.org/nsaa/safety/smart%2Dstyle/</p>	
	<p>Understand the Teaching Cycle. <i>How does this relate to a lesson plan?</i></p>	
	<p>Understand the various models for Learning Styles. <i>Which models work best for you? If you typically rely on one model, you may want to explore other models.</i></p>	
	<p>Understand Teaching for Transfer. <i>What movement patterns transfer to skiing from some of the most common experiences/sports/activities?</i></p>	
	<p>Understand Lateral Learning. <i>You can practice by creating lesson plans with the lateral learning concept. (Hint: this will help with movement analysis.)</i></p>	
	<p>Understand goal setting for guests. <i>Notice that some adaptive guests may not progress as quickly as other guests. Practice setting goals for a variety of guests.</i></p>	
	<p>Learn to use the Guest Centered Teaching model.</p>	
	<p>Read Core Concepts for Snowsports Instructors. <i>What new ideas can you incorporate in your lessons?</i></p>	

✓	Adaptive Specialty: 3-Track/4-Track	Comments/Notes
	Learn to assess the guest's balance, stance & physical needs.	
	Learn about outrigger parts and their adjustments. <i>When would you adjust the length of the outrigger? The brake?</i>	
	Understand principles of ski length and shape. <i>Under what circumstances would you use a longer ski or a shorter ski? A more shaped ski or a straighter ski?</i>	
	Be familiar with and use different adaptive devices. <i>What are the strengths and challenges of each device? Under what circumstances would you use each device?</i>	
	Practice various hands-on assists. <i>In what situations would you use these assists?</i>	
	Practice loads/unloads and safety protocols. <i>What additional safety concerns should you address with a 3-Track/4-Track guest?</i>	
	Learn to ski with outriggers. <i>One of the best ways to understand skiing with outriggers is to practice skiing as a 3-tracker (holding one leg up) and as a 4-tracker. Notice how tired you get when one leg is supporting all your weight. How can you structure your lessons to minimize fatigue?</i>	
	Practice tethering a 4-Track skier. <i>Can you safely tether on beginner terrain (Level I) and/or intermediate terrain (Level II)? Which positions and techniques work best and why? How can you stop quickly in a safe manner?</i>	
	Audit an experienced instructor in a 3-Track/4-Track lesson. <i>What did you learn that you can use in your own 3-Track/4-Track lessons?</i>	
	Write out 3-Track/4-Track progressions beginner (Level I) and/or intermediate (Level II) skiers. <i>Create sample scenarios and then write out sample progressions to fit your scenarios. Try thinking of unique scenarios! How do 3-Track/4-Track progressions differ from other stand-up progressions? How can you give your guest greater independence?</i>	

✓	Adaptive Specialty: Slider (Level II Only)	Comments/Notes
	Learn to assess the guest's balance, stance & physical needs.	
	Learn about the slider parts and their adjustments. <i>What functions do they support? Think up different guest balance, stance and physical issues and then practice adjusting the slider for such issues.</i>	
	Understand principles of ski length and shape. <i>Under what circumstances would you use a longer ski or a shorter ski? A more shaped ski or a straighter ski?</i>	
	Practice loads/unloads and safety protocols. <i>What additional safety concerns should you address with a Slider guest?</i>	
	Practice tethering a Slider. <i>Can you safely tether a Slider? Which positions and techniques work best and why? How can you stop quickly in a safe manner? What terrain is appropriate for a Slider student?</i>	
	Learn to ski with the Slider. <i>One of the best ways to understand skiing with a slider is to have someone tether you in a Slider. How does it feel to depend on someone else for your speed control?</i>	
	Audit an experienced instructor in a Slider lesson. <i>What did you learn that you can use in your own Slider lessons?</i>	
	Write out Slider progressions. <i>Create sample scenarios and then write out sample progressions to fit your scenarios. Try thinking of unique scenarios! How do Slider progressions differ from other stand-up progressions? How can you give your guest greater independence?</i>	

✓	Disability Awareness	Comments/Notes
<i>As an adaptive instructor, you are expected to understand the concepts of skiing and be aware of the disabilities that might affect your guests.</i>		
	Study the disabilities that might cause a person to ski as a 3-Tracker or 4-Tracker or with a Slider, as well as the medications that these individuals might use. <i>The disabilities and diagnoses you are expected to know are listed in the PSIA-NW-AASI Adaptive Alpine Certification Guide. Do you understand the symptoms and the special considerations for each disability? (Hint: Many people find it helpful to create flash cards for studying disabilities.) You will be tested on disabilities and medications during your exam!</i>	
	Know basic Disability Etiquette. <i>Incorporate this etiquette into your lessons and interactions with your guests.</i>	
✓	Prepare for your Level I & II Exam	Comments/Notes
	Complete all prerequisites, as listed in the PSIA-NW Adaptive Alpine Certification Guide.	
	Level II Requirement: <i>Have your ski school trainer verify that you can safely tether a Slider on green and easiest blue groomed terrain.</i>	Trainer's Printed Name: _____ Trainer's Signature: _____ Date: _____
	<i>The PSIA-NW-AASI office will send you a notice of all other participants in your exam. It is your responsibility to work with your fellow examinees and bring all equipment that is needed for your on-hill exam. Bring this completed development log with you to the on-hill exam.</i>	
	Scan or mail a copy of your completed Development Log to PSIA-NW a minimum of one week prior to your on-snow exam, the log will be forwarded on to the examiner for review. The outcome of your Adaptive 3-Track, 4-Track or Slider Exam does not depend on how much you write on this log.	info@psia-nw.org or PSIA-NW Attn: Adaptive Development Log 338 N Wenatchee Ave Wenatchee, WA 98801

Additional Notes
