

Level 1 Alpine + All Level 1 Adaptive Modules = Level 1 Adaptive

L2 Modules → May be completed in any order!

All previously completed **adaptive exam modules** (rec'd in NW) will be accepted as L2 Modules in this new system.

- For example, if you have *already* completed your L1 Alpine and the VI/Cog exam module in NW ... you will need to take L2 3T/4T/Slider, L2 Mono/Bi and L2 Alpine (Ski Day) to complete your L2 Adaptive certification.

If you have *already* completed your L1 Alpine ... you will need to take one L1 Adaptive Module to complete your L1 Adaptive, then complete the full L2 Adaptive process to complete your L2 Adaptive certification.
